This pamphlet provides information that you will need to prepare for the bushfire season on the Strathbogie Tablelands. One very useful resource is the CFA Fire Ready Kit, that provides information to maximise your chances of surviving (and protecting your property).

- Take notice of warnings

If you are in any doubt about what to do, it is always far safer to leave well before a fire.

- **Tableland Roads:** When a fire is threatening the Tableland, NO road here can be considered safe and all roads on and off the Tableland may be closed quite early. If you plan to leave, the safest option is leaving the night before, or at the latest, early the next morning. It is simply too dangerous to be on the road during fire.
